

$$\int_M d\omega = \int_{\partial M} \omega$$

Week 1: September 8-11

- **Lecture 1** - Introduction
- **Lecture 2** - Appendix D (Review of Trigonometry)

Week 2: September 14-18

- **Lecture 3** - 1.5 (Inverse Functions and Logarithms)
- **Lecture 4** - 1.5 (Continued)
- **Lecture 5** - 2.5 (Continuity and Review of Limits)

Week 3: September 21-25

- **Lecture 6** - 2.5 (Intermediate Value Theorem)
- **Lecture 7** - 2.7 (Derivatives and Rates of Change)
- **Lecture 8** - 2.8 (The Derivative as a Function)

Week 4: September 28 - October 2

- **Lecture 9** - 3.1 (Derivatives of Polynomials and Exponential Functions), 3.2 (The Product and Quotient Rule), 3.3 (Derivatives of Trigonometric Functions)
- **Lecture 10** - 4.8 (Newton's Method)
- **Lecture 11** - 3.4 (The Chain Rule), 3.5 (Implicit Differentiation)

October 5-9

- **Lecture 12** - 3.5 (Continued) 3.6 (Derivatives of Logarithmic Functions)
- **Lecture 13** - 3.11 (Hyperbolic Functions)
- **Lecture 14** - 4.1 (Maximum and Minimum Values)

Week 6: October 12-16 (Midterm Recess)

Week 7: October 19-23

- **Lecture 15** - 4.2 (Mean Value Theorem)
- **Lecture 16** - 4.3 (How Derivatives Affect the Shape of a Graph)
- **Lecture 17** - 4.4 (Indeterminate Forms and L'Hospital's Rule)

Week 8: October 26-30

- **Lecture 18** - 4.5 (Summary of Curve Sketching)
- **Lecture 19** - 4.7 (Optimization Problems)
- **Lecture 20** - 4.9/5.4 (Antiderivatives, Introduce indefinite integral notation from Section 5.4 while doing 4.9)

Week 9: November 2-6

- **Lecture 21** - Appendix E (Omit Mathematical Induction)
- **Lecture 22** - 5.1 (Area and Distance)
- **Lecture 23** - 5.2 (The Definite Integral)

Week 10: November 9-13

- **Lecture 24** - 5.3 (Fundamental Theorem of Calculus)
- **Lecture 25** - 5.5 (The Substitution Rule)
- **Lecture 26** - 6.1 (Areas Between Curves)

Week 11: November 16-20

- **Lecture 27** - 6.2 (Volumes)
- **Lecture 28** - 6.2 (Continued), 6.4 (Work)
- **Lecture 29** - 6.5 (Average Value of a Function), 7.1 (Integration by Parts)

Week 12: November 23-27

- **Lecture 30** - 7.1 (Continued)
- **Lecture 31** - 7.2 (Trigonometric Integrals)
- **Lecture 32** - 7.3 (Trigonometric Substitution)

Week 13: November 30 - December 4

- **Lecture 33** - 7.4 (Integration of Rational Functions by Partial Fractions, omit rationalizing substitutions)
- **Lecture 34** - 7.4 (Continued)
- **Lecture 35** - 8.1 (Arc Length)

Week 14: December 7-9

- **Lecture 36** - 7.5 (Integration Strategy)
- **Lecture 37** - Review

(Classes end on December 9th)
