

$$\int_M d\omega = \int_{\partial M} \omega$$

Week 1: September 4-7

- **Lecture 1** - 1.1, 1.2 (introduction, types of data)
- **Lecture 2** - 2.1, 2.2, start 2.3 (frequency distributions, histograms, stem-and-leaf plots, visualizing data)
- **Lecture 3** - finish 2.3, 3.1 (measures of center)

Week 2: September 10-14

- **Lecture 4** - 3.2 (measures of variation)
- **Lecture 5** - 3.3 (measures of relative standing, quartiles and percentiles, boxplots)
- **Lecture 6** - 4.1, start 4.2 (basic concepts of probability, addition rule)

Week 3: September 17-21

- **Lecture 7** - finish 4.2, 4.3 (multiplication rule, conditional probability)
- **Lecture 8** - 5.1, start 5.2 (probability distributions, binomial distribution)
- **Lecture 9** - finish 5.2

Week 4: September 24-28

- **Lecture 10** - 5.3 (Poisson distribution), 6.1 (standard normal distribution)
- **Lecture 11** - 6.2 (applications of normal distributions)
- **Lecture 12** - 6.4 (Central Limit Theorem)

Week 5: October 1-5

- **Lecture 13** - 6.5 (assessing normality)
- **Lecture 14** - 7.1 (estimating a population proportion)
- **Lecture 15** - 7.2 (estimating a population mean)

Week 6: October 8-12 (Midterm Recess)

Week 7: October 15-19

- **Lecture 16** - start 8.1 (basics of hypothesis testing)
- **Lecture 17** - 8.1 (continued)
- **Lecture 18** - finish 8.1, start 8.2 (testing a claim about a population proportion)

Week 8: October 22-26

- **Lecture 19** - finish 8.2
- **Lecture 20** - start 8.3 (testing a claim about a population mean)
- **Lecture 21** - finish 8.3, 9.1 (inferences about two proportions)

Week 9: October 29 - November 2

- **Lecture 22** - 9.2 (inferences about two means)
- **Lecture 23** - start 12.1 (analysis of variance)
- **Lecture 24** - 12.1 (continued)

Week 10: November 5-9

- **Lecture 25** - finish 12.1
- **Lecture 26** - 10.1 (correlation)
- **Lecture 27** - start 10.2 (regression)

Week 11: November 12-16

- **Lecture 28** - finish 10.2, start 10.3 (variation and prediction intervals)
- **Lecture 29** - finish 10.3
- **Lecture 30** - start 10.4 (multiple regression)

Week 12: November 19-23

- **Lecture 31** - 10.4 (continued)
- **Lecture 32** - finish 10.4
- **Lecture 33** - 11.1 (goodness of fit)

Week 13: November 26-30

- **Lecture 34** - start 11.2 (contingency tables)
- **Lecture 35** - finish 11.2
- **Lecture 36** - 13.1 (basics of nonparametric statistics)

Week 14: December 3-5

- **Lecture 37** - Review

(Classes end on December 5th)
