

## ASSIGNMENT: CONCEPT MAP

DUE DATE: OCT 31, 2014

Concept maps are graphical tools for organizing and structuring interrelated ideas. They include concepts, usually placed in circles or boxes, and relationships between concepts, indicated by a line linking the two concepts. Words on the line specify the relationship between the two concepts.

**I want you to create a concept map for what we have learned in this class so far.** More information regarding concept map can be found online. It does not need to be perfect, so generate your own concept maps to express your own understanding of the subject matter. Don't just copy it from somewhere since it defeats the purpose of the exercise, which is to help you understand the connection between different concepts.

If you need any help feel free to stop by my office during office hours.
