## Homework Assignment 1

All of the questions from Part A will be graded. One of the questions from Part B will be graded in detail, while the other will be marked for completion. Assignments will be submitted via Crowdmark.

Part A. [Short Questions; 4pts]
Exercise 1. Let $n$ be an integer. What are the possible remainders when $n^{2}$ is divided by 7 ?
Exercise 2. If $d=\operatorname{gcd}(1246,382)$, find $x$ and $y$ such that $1246 x+382 y=d$.
Part B. [Proof Questions; 6pts]
Exercise 3. Prove that if $a$ and $b$ are integers such that $7 \mid a^{2}+b^{2}$, then $7 \mid a^{2}$ and $7 \mid b^{2}$. [Hint: Exercise 1 may help.]
Exercise 4. Prove that if $\operatorname{gcd}(a, b)=1$ and $c \mid(a+b)$, then $\operatorname{gcd}(a, c)=\operatorname{gcd}(b, c)=1$.
